

Team Fave Features Of The Month ★

This month we asked the team at LOVO what is their fave Genny features that they can't live without! While there were multiple contenders, we had three clear top winners!

🗑️ **Bulk Edit** - This go-to feature is a firm fan favorite in the office, allowing you to edit multiple blocks at once. It's a true time saver and the one element of Genny our team could not live without.

📏 **Snap Tool** - We sense a theme here, another feature that saves time and ensures your blocks on the timeline editor are perfectly aligned. Just pull your blocks close together and let this tool do the rest.

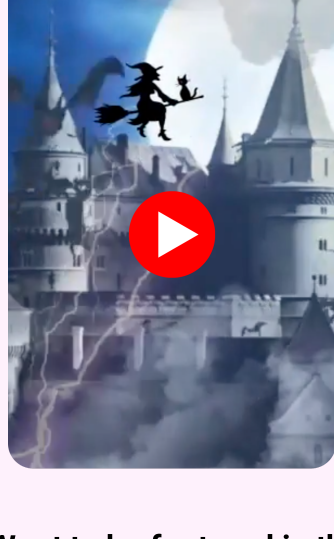

🗣️ **AI Writer** - Powered by ChatGPT, this nifty feature helps you say goodbye to writer's block forever. A great way to kick start your script, and you guessed it, save time!

LOVO In Action 🧛‍♀️

Amongst our library of over **500+ voices**, we have some truly bone-chilling AI voices, and seeing as it is Halloween, we thought it would be the perfect opportunity to showcase some spooky content from our Discord members!

1. Enjoy some ghoulish stories to get you in the Halloween mood 🧛‍♀️
2. Discover the mysteries of black holes 🕳️
3. Immerse yourself into a world of spine-tingling horror stories 🩸

Want to be featured in the next newsletter? Submit your content via our **Discord** server for a chance to be in our next newsletter and reach **over 1M readers!**

If you have content that you want us to see - make sure to tag us on your socials - we'd love to see them!

November Sneak Peek 👁️👁️

If you made it to the end of the newsletter, then you surely deserve a little preview of what is to come in November!

Auto Subtitle Generator - An exciting launch is upon us! We will be introducing subtitles that can be auto-generated with speech-to-text in over 20 languages, with a multitude of fonts and colors. In addition, you'll have the option of animated or static subtitles - say yes to increased content engagement and reach. 🗣️

Teams 2.0 - We are releasing an update to our newly launched Teams feature, which will allow you to assign editor and owner roles, delegate projects to team members, and create multiple workspaces - hello organizational bliss! 😊

We'll see you soon for another roundup of all things LOVO!
